Master the basic methods of intellectual property protection and apply the rules of registration of intellectual property rights.</p> <p>PLO 35. To carry out professional communication: create communicative products, analyze communicative activities; adequately react to criticism, generate and argue new ideas; to exert a communicative influence on people, motivating them to activity; to prove own thoughts; identify, apply information and communication technologies; to develop skills of interpersonal interaction in the staff.</p> <p>PLO 36. To apply language, speech, linguistic, linguosociocultural and communicative skills for effective communication in a foreign language.</p> <p>PLO 37. Organize and carry out an audit of occupational safety in the organization</p> <p>PLO 38. To use international occupational safety standards to improve the state of occupational safety</p> <p>PLO 39. To develop effective civil safety management systems for the economic subject</p>
Resource Providing of Program Implementation	
<p>Cadre ensuring</p>	<p>The educational program is provided by scientific and pedagogical employees of appropriate scientific and professional direction, which</p>

	level of qualification corresponds to the License contract for educational activities, approved by the Cabinet of Ministers of Ukraine dated December 30, 2015 № 1187 ((in editing of the Cabinet of Ministers of Ukraine dated May 10, 2018 № 347))
Material and technical ensuring	The state of material and technical base conforms to the requirements and provides the possibility of effective educational process and organization of research work. For preparing of applicants are used 3 specialized laboratories: “Specialized laboratory of occupational safety”, auditorium 202 in central building, “Specialized computer laboratory of civil defence”, auditorium 348 in academic building, “Laboratory of civil safety management”, auditorium 350 in academic building, and also specialized computer auditoriums of University with necessary equipment. The available premises (educational, training and production, common, sports and others) of the University correspond to sanitary norms and rules, state building norms of Ukraine.
Information, educational and methodical ensuring	The content and quality of informational, educational and methodological ensuring corresponds to the requirements and is sufficient to ensure quality training in modern conditions. Information about educational programs, teaching, research and educational activities, the structure of the University, entrance regulations, announcements of events, news, etc. is popularized on the official website of the University (https://www.kname.edu.ua/). O.M. Beketov NUUE has a library, which includes scientific, student and fiction loans and reading rooms for 540 seats. The University has an electronic repository (http://eprints.kname.edu.ua/), which provides access of applicants to methodological and educational materials (educational and methodological complexes of disciplines, materials for independent and individual work of students, internship programs, etc.), as well as to the electronic version of the scientific and technical collection “Municipal economy of cities” and materials of scientific conferences. Students and teachers have access to the Moodle distance learning system (http://cdo.kname.edu.ua). All computers in the library are connected to the World Wide Web. The reading room provides access to Internet resources using Wi-Fi technology. Access to Web of Science and Scopus scientometric databases is available.
Academic mobility	
National credit mobility	Opportunity to participate in national credit mobility programs at other Universities in the country, which provide training for bachelors in the specialty.
International credit mobility	O.M. Beketov NUUE has 5 agreements currently in force within Erasmus + International Credit Mobility with the following foreign Universities, namely: 1) Middle East Technical University, Ankara, Turkey (METU) 2) The Aristotle University of Thessaloniki, Greece 3) University of Nova Gorica, Slovenia 4) Estonian University of Natural Sciences, Tartu, Estonia 5) Lodz University of Technology, Poland
Training of foreign applicants for higher education	According to O.M. Beketov NUUE Entrance Regulations
